

Exhibit A: Insights Measures

Timeline	Measure	Applies to Health IT Modules Certified to the Following Certification Criteria	Summary of Data to be Reported
Beginning April 2025	Individuals’ access to EHI measure – § 170.407(a)(1)	<ul style="list-style-type: none"> • View, download and transmit to 3rd party – § 170.315(e)(1) • Standardized API for patient and population services – § 170.315(g)(10) 	The numbers of unique patients that used each of the specified criteria to access their EHI. ⁱ
	Applications supported through certified health IT measure – § 170.407(a)(4)	<ul style="list-style-type: none"> • Standardized API for patient and population services – § 170.315(g)(10) 	App names and app developer names, intended app purposes, intended app users, and whether a registered app is in “active” use across a developer’s client base. ⁱⁱ
	Immunization administrations electronically submitted to an immunization information system through certified health IT measure – § 170.407(a)(8)	<ul style="list-style-type: none"> • Transmission to immunization registries – § 170.315(f)(1) 	The volume of immunization administrations electronically submitted to an immunization information system (“IIS”) through certified health IT (developers that do not have users that administered immunizations during the reporting period would attest that they are unable to report on this measure). ⁱⁱⁱ
	Immunization history and forecasts measure – § 170.407(a)(9)	<ul style="list-style-type: none"> • Transmission to immunization registries – § 170.315(f)(1) 	The number and percentage of IIS queries made per individual with an encounter. ^{iv}
Beginning April 2026	Consolidated Clinical Document Architecture (“C-CDA”) documents obtained using certified health IT by exchange mechanism measure – § 170.407(a)(2)	<ul style="list-style-type: none"> • Clinical information reconciliation and incorporation – § 170.315(b)(2) 	The volume of C-CDA documents obtained using certified health IT by exchange mechanism relative to patient volume. ^v
	C-CDA medications, allergies, and problems reconciliation and incorporation using certified health IT measure – § 170.407(a)(3)	<ul style="list-style-type: none"> • Clinical information reconciliation and incorporation – § 170.315(b)(2) 	The number of C-CDA documents that are reconciled and incorporated as part of a patient’s record by clinicians or their delegates. ^{vi}
	Use of FHIR in apps supported by certified API technology measure – § 170.407(a)(5)	<ul style="list-style-type: none"> • Standardized API for patient and population services – § 170.315(g)(10) 	<ul style="list-style-type: none"> • The volume of FHIR resources transferred in response to API calls from apps connected to certified API technology by FHIR resource type. • The volume of FHIR resources transferred by FHIR version used and by U.S. Core Implementation Guide version deployed. • FHIR resources transferred in response to calls from two different endpoint types—patient-facing and non-patient-facing—the latter of which would include endpoints that do not facilitate individuals’ access (e.g., clinician, payer, or public health endpoints). • The number of deployments that the developer supports across its customer base.^{vii}
	Use of FHIR bulk data access through certified health IT measure – § 170.407(a)(6)	<ul style="list-style-type: none"> • Standardized API for patient and population services – § 170.315(g)(10) 	The number of bulk data downloads completed through certified health IT relative to the number of certified health IT deployments or installations. ^{viii}

Timeline	Measure	Applies to Health IT Modules Certified to the Following Certification Criteria	Summary of Data to be Reported
	Electronic health information export through certified health IT measure – § 170.407(a)(7)	<ul style="list-style-type: none"> <li data-bbox="665 219 1148 277">• Electronic Health Information export – § 170.315(b)(10) 	The number of full data EHI exports requests processed during the reporting period and reported by the following subgroups: (1) by a single patient EHI export; and (2) by patient population EHI export. ^{ix}

Note: As proposed, health IT developers may report that they do not meet the minimum reporting requirements for a measure if: (i) they do not have at least one product certified to one or more of the applicable certification criteria for a particular reporting measure; (ii) they do not have at least 50 hospital users or 500 clinician users across their certified health IT; or (iii) their health IT product does not have any users using the functionality specified by the certification criteria specified in the applicable measure during the reporting period.^x
