

DIYA WYNN

Senior Practice Manager, Responsible AI
Amazon Web Services

DIYA WYNN has more than 25 years of experience as a technologist and has been at AWS for six years. She started and led customer engagement globally in Responsible AI. Diya leads organizations across various industries in taking intentional action to build trust in AI by uncovering potential unintended impacts, and mitigating risks related to its development, deployment and use. She also meets with legislators and policymakers globally to provide perspective to influence regulation and policy on AI. Diya is also an international speaker and has been awarded and recognized in the industry for her work in Responsible AI. She serves on non-profit boards, mentors through multiple organizations and guest lectures on responsible and inclusive technology.
