

**TIMOTHY KOTIN**

Co-Founder  
Superfluid Labs

**TIMOTHY KOTIN** is a Ghanaian technologist, data science and AI expert, serial entrepreneur, and international development advisor with over 15 years cross-domain experience. He has lived in and worked for customers across North America, Europe, and over 10 African nations. His career has spanned working as a consultant with Dalberg Global Development Advisors in New York, as a Research Scientist at IBM Research in Nairobi, and co-founding multiple award-winning technology ventures serving emerging markets. Examples include Superfluid Labs (FinTech) and E-Coach Solutions (EdTech). He is a recognized thought-leader at the intersection of artificial intelligence and international development, served on the USAID Advisory Panel on Artificial Intelligence (AI) and Machine Learning (ML) in 2019, and led or advised on projects for AI Commons, Data.org and GIZ, to name a few. He studied computer science and electrical engineering at Harvard University and holds an MPhil. in Engineering for Sustainable Development from the University of Cambridge as a Gates Cambridge Scholar.
